Relevant Experience

ENOVERLABS

Intern

Remote, Nigeria
March. 2022 –
Present

- Participated in a hands-on internship as a Frontend Developer, collaborating in a cross-functional team of Designers and Product Managers. Our project? An app reinventing job search for service graduates.
 - Managed full-cycle application development, from inception and design to build.
 - Enhanced technical skillset and learned new web development technologies, demonstrating continuous learning and adaptability.
 - Despite the app still being in the pre-user stage, provided hands-on support to drive it towards completion, revealing growth potential and practical experience.
-

PROJECTS

Tints And Shades

React | TypeScript

- Developed an intuitive React application that generates tints and shades of colors by leveraging the TinyColor library to handle color manipulation and also discover color names of any hex, hsl and rgb colors you know.
 - Embraced the power of the utility-first CSS framework, Tailwind, for styling the application. Also used delved into the world of TypeScript for this project.
-

GitHub Portfolio API Integration

React | Framer-Motion | Github Api

- Built an engaging platform using react-query to fetch my GitHub portfolio via the GitHub API.
 - Ensured a seamless user experience when errors occurred by strategically integrating react-error-boundary for error handling and fallback UIs.
 - Implemented a search functionality, enabling users to easily find any repository.
 - Boosted page performance by 65% by using lazy loading technique. Providing fast and fluid experience
-

Blog App

Nextjs | TypeScript | Firebase

- Orchestrated a full-featured blog application employing Next.js and TypeScript. Created an avenue for thoughts and ideas to roam free on the web!
- Empowered the app with Firebase for its real-time database capabilities. Also implemented a user

authentication system with Firebase, enabling personalized experiences for each reader.

PROFESSIONAL EXPERIENCE

HYCAL

Production Manager

Onsite, Nigeria Feb
2017 – Jan 2021

- Led the charge to achieve high production standards and efficiency, navigating timelines, budgets, and team coordination.
- Acted as the central communication hub with regulatory agencies such as NAFDAC and SON during inspections, showcasing my diplomatic finesse.
- Vigilantly oversaw product inspections from inception to completion, ensuring all stages of production were executed flawlessly.
- Fostered productive cross-department collaborations, notably with marketing teams and other colleagues, to deliver cohesive project results.

COMMUNITY

- I engage in mentoring sessions, empowering beginners in the world of web development at [Altschool](#) a software engineering school aimed at empowering people with needed skills to grow in the world of technology. Sharing what I know, and learning even more in return.
- I function presently as the Frontend Community Manager for [Nexascale](#). Cultivating bonds and broadening horizons, all in a day's work!
